DGCA RTR(A) PRACTICE SIMULATOR

The complete Radio Telephony exam-prep platform — practice papers, voice-based RT drills, study notes and mock scenarios in one place.

Live preview of the simulator dashboard

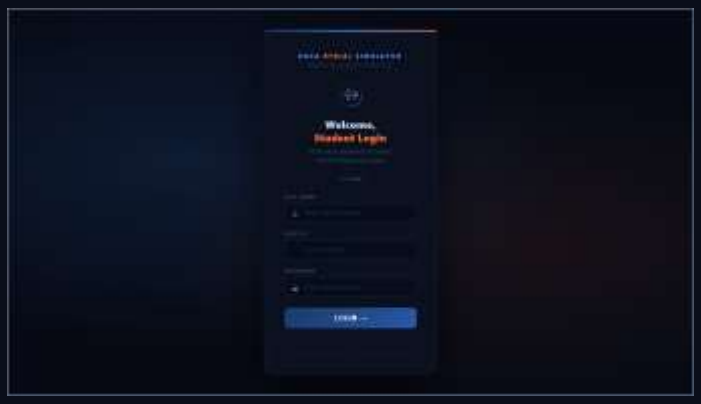

14+	38	100%
Practice Papers	Syllabus Topics Covered	Real DGCA Exam Format

Why RTR(A) trips up so many pilots

The RTR(A) practical exam isn't a knowledge problem — it's a fluency problem. Candidates know the theory but freeze when asked to respond live, in real time, using exact ICAO phraseology, under a ticking clock. Most students only get a handful of live mock sessions before the real exam.

The DGCA RTR(A) Practice Simulator solves this by giving every student unlimited practice — the same four-quadrant exam layout, the same charts, the same scenario structure as the real WPC/DGCA exam — available any time, from any device.

Secure student login — every student gets a private ID and password

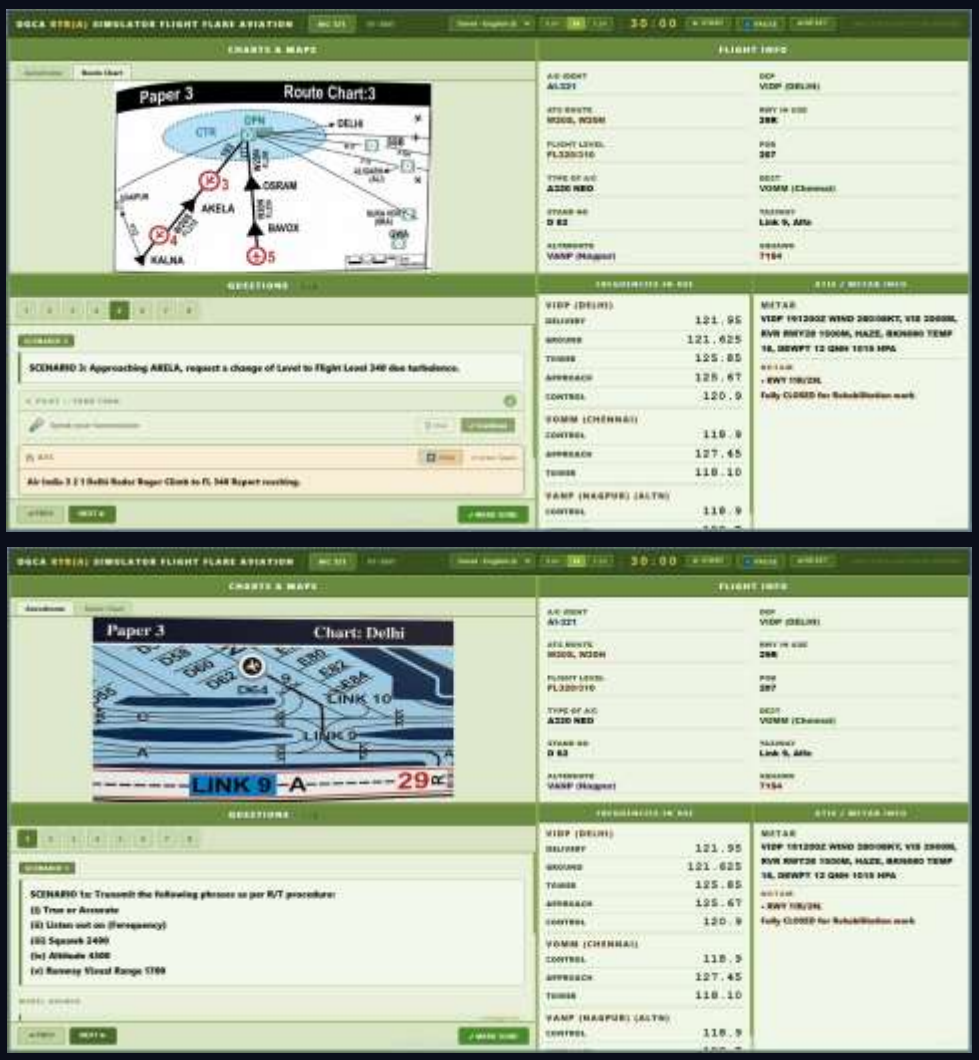

What makes it different

- Built to mirror the actual DGCA RTR(A) practical exam screen — not a generic quiz app.
- Covers all 14 official-style question papers, with charts, METAR/ATIS data and live scenario flow.
- Designed and maintained specifically for Flight Flare Aviation students.

1. Practical Exam Simulator

A four-quadrant layout identical to the real exam interface — route charts, aerodrome charts, flight info, frequencies in use and live METAR/ATIS, all in front of the student exactly as the examiner sees it.

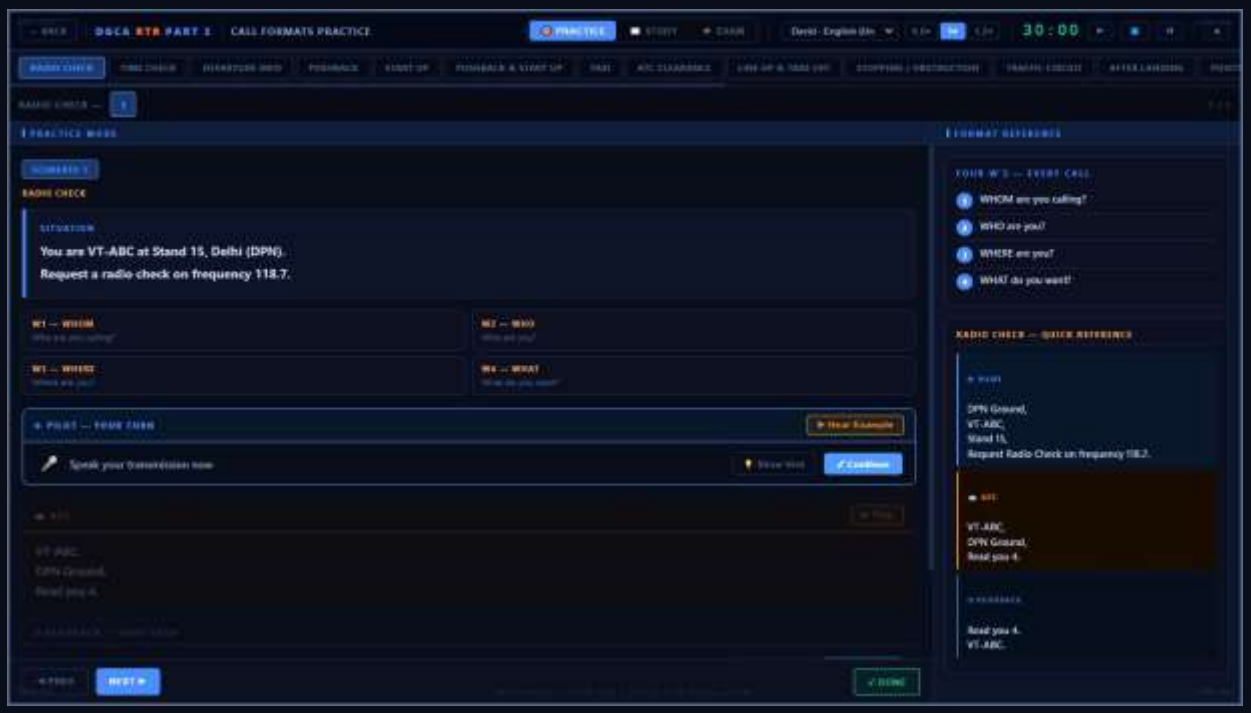

Route chart & aerodrome chart views, with zoom and full-screen support

Includes

- Chart zoom / fullscreen so nothing gets missed under exam pressure.
- Scenario-by-scenario navigation, just like the real paper (1 through 8).
- Full flight info panel: A/C ident, ATS route, flight level, squawk, alternates.
- Live-style frequencies box and ATIS/METAR/NOTAM panel for realistic context.

2. Voice-Based RT Practice

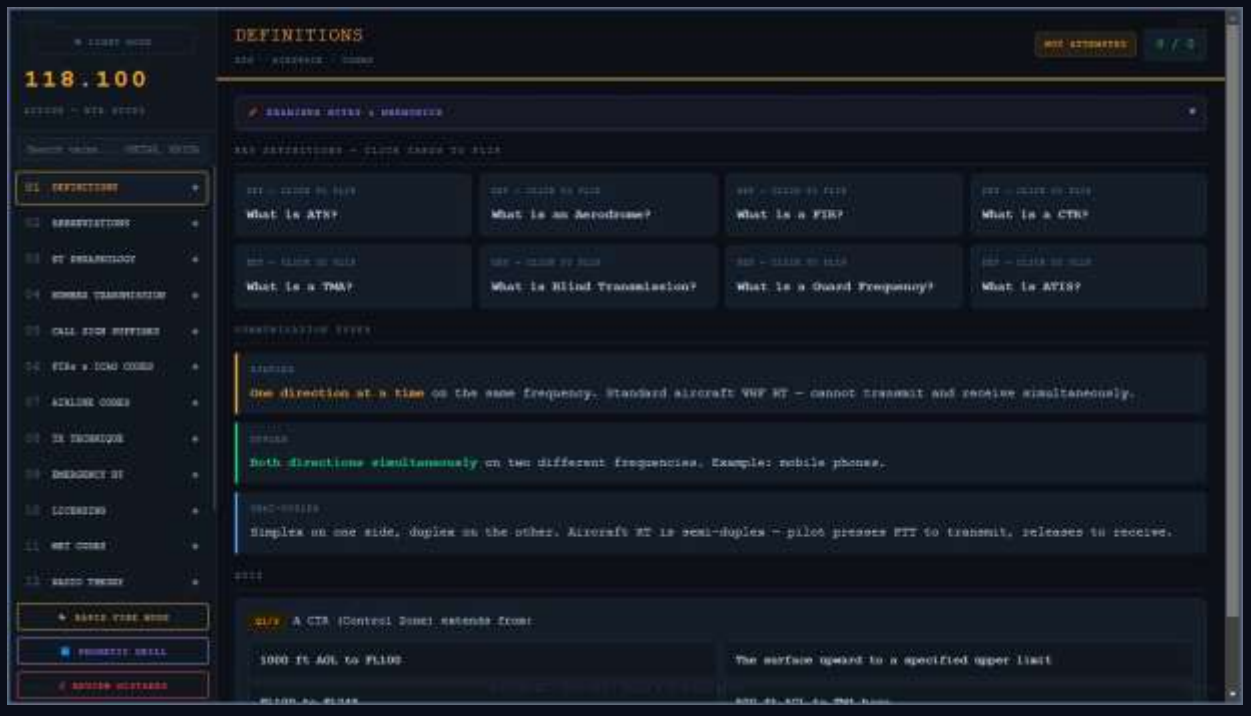

Students speak their transmissions out loud and get instant, hands-free feedback — built around the real exam's call-and-response rhythm, with model answers and hints available if they get stuck.

Call-format practice — Radio Check, Departure Info, Taxi, ATC Clearance and more

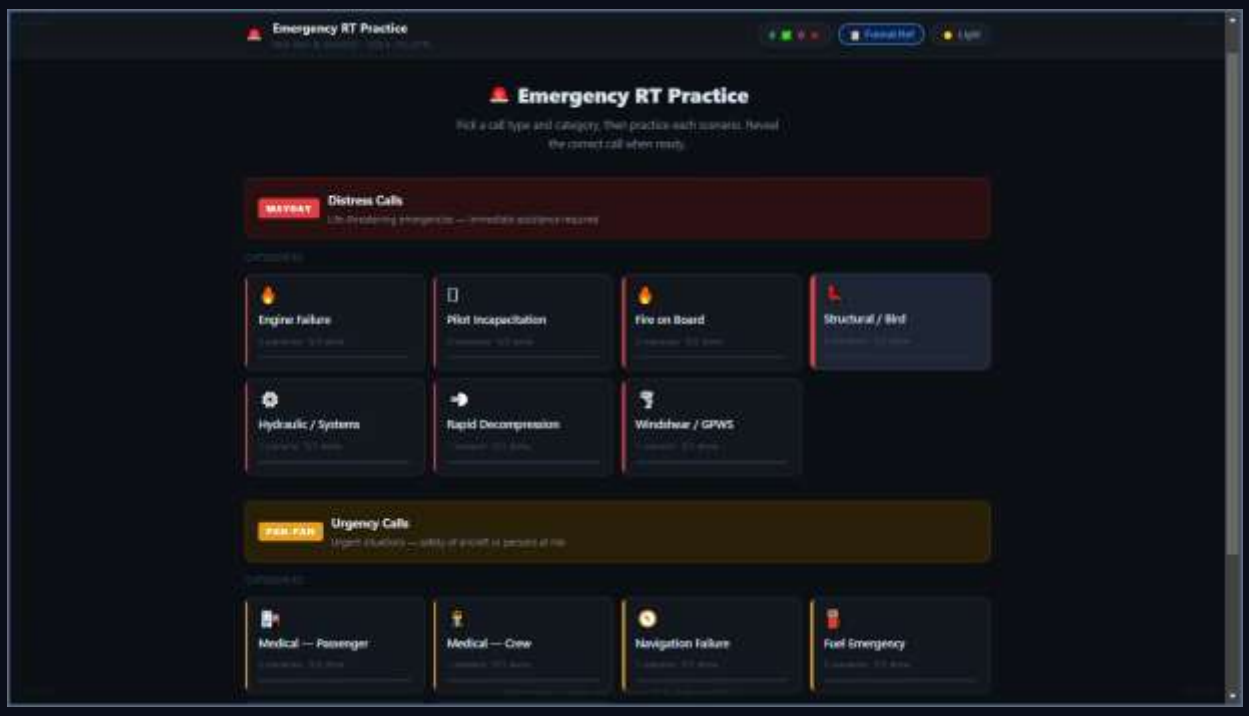

3. Complete Study Notes & Flashcards

All 38 RTR(A) syllabus topics condensed into a single, searchable study page — definitions, abbreviations, phraseology, number transmission and radio theory, with flip-card review and quick quizzes built in.

4. Emergency & Urgency Call Practice

A dedicated module for MAYDAY and PAN-PAN calls across every major emergency category — engine failure, fire on board, medical emergencies, fuel emergencies and more — an area many students never get to practise before their exam.

Emergency RT practice, organised by call type and failure category

Built-in security & fair access

- Every student gets an individual login — no shared links, no paper leaks.
- Question papers are served securely so they can't be copied out via a direct URL.
- Session tokens expire automatically to keep access limited to paying students.

5. Live Mock Sessions with Your Mentor

The simulator builds fluency on your own time — but nothing replaces a real, live mock exam with someone listening and correcting you in the moment. Every student gets 3–4 one-on-one mock practice sessions built around exactly that.

Full mock exams

3–4 complete practice runs, conducted just like the real DGCA practical — same pressure, same pacing, same structure.

Live transmission correction

Every call you make is corrected on the spot — wrong phraseology, missed readbacks, and format errors are caught immediately, not after the exam.

Clearing common mistakes

Targeted feedback on the mistakes that repeatedly trip up candidates — word order, number transmission, call sign discipline, and the phrases examiners listen for.

Personal guidance

One-on-one guidance on tone, pacing and confidence, so you walk into the real exam having already done it right, multiple times.

Think of the simulator as your practice ground, and these mock sessions as the real rehearsal — by the time you sit the actual DGCA exam, it will feel like something you've already done successfully several times over.

Your content is protected

The simulator is locked down so your papers, charts and study material stay exclusive to paying students and can't be leaked or redistributed.

Copy-protected

Text on the site cannot be selected or copied out.

No saving

Pages and content cannot be saved locally by students.

Print-blocked

Printing of exam papers and charts is disabled.

Image-protected

Charts and screens cannot be saved as images.

Any attempt to copy, save, print, or screenshot protected content triggers an on-screen warning.

RTR Simulator Notice — shown to every student at login

Each student is assigned a unique User ID and Password. Do not share your login credentials with anyone.

All login activities are monitored and recorded. Any attempt to share accounts, copy content, print material, distribute simulator content, or engage in unauthorized activities may be logged and reported to the instructor.

Violation of these rules may result in immediate suspension of simulator access and removal from classes.

By logging in, you agree to these terms.

RT PHRASEOLOGY

27+ STANDARD PHRASES

NOT ATTEMPTED 0 / 0

PHRASE	MEANING
ACKNOWLEDGE	Let me know you received and understood this message
AFFIRM	Yes — that is correct
APPROVED	Permission granted for the proposed action
BREAK	Separation between parts of a message to different stations
BREAK BREAK	Urgently separates messages in very congested conditions
CANCEL	Annul the previously transmitted clearance
CHECK	Examine system or procedure — no reply normally expected
CLEARED	Authorised to proceed under conditions specified
CONFIRM	Request verification — or — have you received?
CONTACT	Establish communications with...
CORRECT	True / Accurate
CORRECTION	An error was made; the correct version follows
DISREGARD	Ignore — this transmission is in error
EXPEDITE	Carry out without delay
GO AHEAD	Proceed with your message (NOT permission to move/takeoff)
HOW DO YOU READ	What is the readability of my transmission? (Scale 1–5)
I SAY AGAIN	Repetition for emphasis or because of bad readability
MAINTAIN	Continue in accordance with condition(s) specified
MONITOR	Listen out on (frequency)

Memory-Based Questions · Real Exam Patterns · Radio Telephony Practical

This set has been prepared using recent DGCA RTR Part-2 practical examination patterns and memory-based questions shared by successful candidates. Read each question, pause for a few seconds, and answer aloud using standard ICAO/DGCA R/T phraseology before checking the reference transmission and reply below.

84 Questions

ALL | NORMAL OPS | PAN-PAN | MAYDAY

Search questions...

01 Request Start-up. — NORMAL OPS

PILOT: DPN Ground, VT-ABC, Stand 10, SCC POB 150, request start-up, information Bravo.
ATC: VT-ABC, start-up approved.
PILOT: Start-up approved, VT-ABC.

02 Request Pushback and Start-up. — NORMAL OPS

PILOT: DPN Ground, VT-ABC, Stand 10, SCC POB 150, request pushback and start-up, information Bravo.
ATC: VT-ABC, pushback approved, facing north on completion, start-up approved.
PILOT: Pushback approved, facing north on completion, start-up approved, VT-ABC.

03 Request Departure Information and Start-up. — NORMAL OPS

04 Request Radio Check. — NORMAL OPS

05 Immediately after Start-up and Pushback, Cabin Crew reports an unruly passenger on board. Coordinate with ATC and deboard the passenger. — NORMAL OPS

06 After deboarding the passenger, request Start-up and Pushback again. — NORMAL OPS

07 During Pushback, another aircraft is taxiing behind your aircraft. Take appropriate action. — NORMAL OPS

08 During Pushback, ATC instructs you to hold pushback due traffic behind. Read back the instruction. — NORMAL OPS

09 Request ATC Clearance. — NORMAL OPS

10 Read back the assigned ATC Clearance. — NORMAL OPS

11 Request Taxi Clearance. — NORMAL OPS

12 Request Departure Clearance. — NORMAL OPS

13 Request Immediate Departure. — NORMAL OPS

14 While taxiing, a Fire Tender is crossing the taxiway ahead. Take appropriate action. — NORMAL OPS

15 While taxiing, a Follow-Me Vehicle is required. Request assistance. — NORMAL OPS

16 While taxiing, another aircraft is blocking your taxiway. Take appropriate action. — NORMAL OPS

Emergency RT Practice

Remembering MAYDAY vs PAN-PAN

MAYDAY — Distress

Use MAYDAY when there is grave and imminent danger and immediate assistance is required.

- Engine fire
- Any fire on board
- Brake failure if it threatens safe landing
- Engine failure (especially single-engine aircraft, or multiple-engine issues)
- Rapid loss of height due to a serious emergency
- Hydraulic failure causing loss of control or major systems
- Pilot incapacitation when safety is threatened
- Bird strike with major damage
- Pressurization failure above FL100 requiring emergency descent
- Forced landing
- Landing gear stuck/retracted requiring a likely belly landing
- Severe structural damage
- Bomb threat on board

MEMORY AID

Fire, loss of control, loss of critical systems, serious structural damage, or a situation that may endanger lives = **MAYDAY**.

PAN-PAN — Urgency

Use PAN-PAN when there is an urgent situation affecting safety, but there is not yet immediate danger.

- Suspected hydraulic leak
- Uncertain position
- Minimum fuel (not fuel emergency)
- Navigation failure in IMC
- Passenger having a heart attack
- Need deviation due to weather
- ATC not in contact
- Fire observed near a navigation aid
- No contact with tower
- Unsafe gear indication (gear may still be down and locked)
- Minor engine vibration
- Bird strike with only minor vibration and no significant damage
- Overheated brakes
- Weather warning
- Severe turbulence

MEMORY AID

System degradation, navigation issues, medical situations, communications problems, or situations requiring priority but not immediate rescue = **PAN-PAN**.

BORDERLINE CASE — LANDING GEAR

- Unsafe gear indication → usually **PAN-PAN**
- Gear confirmed stuck/retracted requiring belly landing → **MAYDAY** due to the significant risk during landing
